

FIRE SOLUTIONS

***DESIGN, INSTALLATION AND MAINTENANCE OF
FIRE DETECTION AND SUPPRESSION SOLUTIONS***

O'Donnell Griffin specialise in solving challenging fire detection and suppression problems for commercial and industrial businesses in Australia.

Key factors of our success in bringing together the best solution for our clients are:

- experience in integrating electrical, airconditioning and fire services
- multi-skilled technicians
- technology independence
- keeping abreast of developments in fire technology

From turn-key design, through to the supply, installation, testing, commissioning and maintenance, O'Donnell Griffin deliver an integrated, cost-effective, reliable solution.

SPECIALIST AREAS OF EXPERTISE INCLUDE:

- Wet Systems
- Detection Systems
- Passive Systems
- Fire Doors
- Service and Maintenance

MANAGING YOUR RISK

Managing the risk of fire breaking out is the number one priority in your fire safety strategy.

O'Donnell Griffin has the experience and expertise to assist you in identifying risks, and then designing a system to meet the required standards, using the most appropriate technology to manage your business risk.

O'Donnell Griffin's integrated multi-skilled team and technology independence enable us to bring together the most cost-effective solution from installation through to the ongoing service of the system.

We work together to deliver innovative and reliable solutions for our customers.
