

Name:	North West Shelf Onshore Gas Plant	Client:	Woodside Energy Ltd
Site Location:	Dampier, Western Australia	Contract Duration:	2 years with renewal option.

Project Description:

Haden Engineering are under contract to provide the North West Shelf Onshore Gas Plant with a comprehensive range of mechanical services, maintenance, installation instrumentation, plant refurbishment and upgrade and electrical services.

We provide preventative maintenance services to the following WEL assets:

- Onshore gas plant sub stations, Field Aux buildings, process equipment & admin/warehousing facilities
- King Bay supply base warehouse and administration facilities
- Offshore asset supply vessels
- Heliport building terminal and administration facilities.

The facility includes four LNG processing trains, a natural gas plant, LPG and condensate production and storage and loading facilities. The plant processes natural gas, liquefied gas, liquid petroleum and condensate from the two offshore pipelines which run from the North Rankin, Goodwyn and Cossack Pioneer offshore facilities.

All maintenance work is completed according to maintenance schedules developed with Woodside management and a maintenance plan which includes:

- Life cycle planning
- Site specific equipment schedules
- Cost budgets.

We provide quality assured services with all repair works subject to 12 months warranty. All work undertaken by Haden is in accordance with the Haden quality assurance policy including refrigerant handling.
